

# Configuring Noah with SQL Server Planning Checklist

<b>Location Questions</b>	
What is the location name and Noah serial number?	
Is there or will there be a central server that multiple offices connect to?	
Are they using Microsoft SQL Server for their Noah database?	
How many offices have Noah installed?	
Is the version of Noah the same at all offices?	
If there are multiple offices, do they each have their own Noah license?	
<b>Server Questions</b>	
What is the operating system?	
Is this a new server?	
If Noah is installed, what is the version of Noah?	
If Noah is installed, are they using default CE database or already using SQL Server?	
If new, will they be bringing a Noah database from another machine?	
<ul style="list-style-type: none"><li>▪ If another Noah 4 database Backing up and Restoring?</li><li>▪ Exporting from old and Importing on new?</li><li>▪ Is the database on the other machine using SQL Server?</li><li>▪ If a SQL Server database, the dba will move the database</li></ul>	
<b>SQL Server Questions</b>	
What is the version of Microsoft SQL Server?	
What is the instance name?	
What Authentication method was selected?	
If SQL is on separate server has a sql user and password been made available for the connection string?
