

Noah 4.14 - Release Notes for Developers

Module API

A new method has been added to force the update of the object hierarchy in the ModuleAPI.

`public void RefreshActionHierarchy()` - (HIMSA Ref. Noah-1074)

Business API

NoahProperties now has two new properties. (HIMSA Ref. NE-524)

- `public string CloudVersion { get; private set; }`
 - The Version of Noah Cloud is null if not connected to the cloud i.e. if `ServerType` is different from `NoahServerType.NoahES`
- `public string CloudIdpVersion { get; private set; }`
 - Version of the Idp in the cloud is null if not connected to the cloud i.e. if `ServerType` is different from `NoahServerType.NoahES`

Property `FastViewsEnabled` is obsolete and will always return true. (HIMSA Ref. NOAH-638).

Database interface

No changes to the interface.

Noah Mobile

No changes. No new version has been released.
